About Us

Jeanette is a qualified Spatial (3D) Designer with many years working in environments where the client experience is paramount. She now brings this experience into the e-Learning environment as an Instructional Designer.

Jeanette has a passion for colour, composition and creating work that helps the viewer feel at ease with the learning process.

Kay has extensive experience in adult education, designing interactive learning and assessment material for the tertiary education sector as well as for a wide range of businesses.

Kay loves the challenge of breaking learning material into bite sized chunks that engage the learner. She has a love of teaching and is just as comfortable in front of the class as she is in the background creating learning material.

Why Choose Us?

We create learning material from our wide background in the business and education sectors, with 'feet on the ground' experience and solutions.

We offer our clients the following:

- Just-in-time training using a variety of media
- Development of interactive learning material
- Face to face training
- Train the trainer
- Development of training manuals and material
- Assessment of skills
- Practical, visual learning rather than theoretic learning
- Blended learning

**"Online learning is not the next big thing,
it is the now big thing."**

Donna J. Abernathy

**"We need to bring learning to people
instead of people to learning."**

Elliot Masie
